

HAZEM GOMAA

Full Stack .NET Developer

Egypt || +20 1020397756 || hazemgomaa467@gmail.com

www.linkedin.com/in/hazem-gomaa

Profile

Full Stack .NET Developer focused on building practical web applications and solving software development problems. Skilled in C#, Object-Oriented Programming, ASP.NET Core, Web API, Entity Framework Core, SQL Server, REST APIs, and frontend development. Strong understanding of backend development, database integration, API design, and frontend-backend integration. Passionate about continuous learning, writing maintainable code, and building reliable web applications.

Education

Assuit University

Faculty Of Commerce, Public Policy Information Systems Program

2024 – Present

Egypt

Internships

Digital Egypt Pioneers Initiative (DEPI)

july to Present

- Completed Full Stack .NET training focused on building web applications using C#, ASP.NET Core, Web API, Entity Framework Core, SQL Server, and frontend technologies.
- Developed practical skills in backend development, database integration, REST APIs, authentication, and full-stack application development.

Information Technology Institute (ITI)

july to august 2026

- Completed Frontend Development training using Vue.js, focusing on building modern and responsive web interfaces.
- Developed practical skills in Vue.js, JavaScript, HTML, CSS, component-based development.
- Applied frontend development concepts to build interactive web applications and integrate them with backend APIs.

Projects

University Website

Full Stack Web Application

- Developed a practical university web application applying full-stack development concepts.
- Implemented backend functionality using C# and ASP.NET Core.
- Developed and integrated REST APIs to manage application functionality and data.
- Worked with SQL Server and Entity Framework Core for database management and data access.
- Applied Object-Oriented Programming, CRUD operations, Dependency Injection, and API development concepts.
- Focused on maintainable application structure and practical user requirements.

Skills

Technical Skills

- Programming Languages:** C#, JavaScript, SQL
- Backend:** ASP.NET Core, ASP.NET Core Web API, Entity Framework Core, LINQ, REST APIs, Dependency Injection
- Frontend:** Vue.js, HTML, CSS, Responsive UI, REST API Integration
- Database:** SQL Server, Relational Databases, Database Relationships, EF Core Migrations
- Software Development:** Object-Oriented Programming (OOP), SOLID Principles, CRUD Operations, DTOs, Validation, Error Handling, Clean Architecture
- Tools:** Git, GitHub, Swagger, Postman, Visual Studio

Soft Skills

- Problem Solving, Analytical Thinking, Communication, Presentation, Teamwork, Collaboration
- Time Management, Adaptability, Continuous Learning, Client-focused Communication
- Languages:** Arabic: Native, English: B2+
